U.S. Edition

Sage 50 Business Intelligence

Reports you can rely on. Information you can act on.

Sage 50 Business Intelligence* is a powerful Microsoft® Excel®-based reporting solution that integrates with your Sage 50 software. You can run customized reports, on-demand, without having to manually update spreadsheets. Now it's easier than ever to find the answers you need and make informed decisions with confidence.

Critical information made visible.

Business Intelligence uses real-time information pulled directly from your Sage 50 software – and even other databases – to give you easier access to your business information. You can create dynamic reports that can be refreshed as needed, drilled into for more detail, and sliced and diced for further insight. Get the information you need to make timely, business-critical decisions.

Spreadsheet-based reporting at your fingertips

Business Intelligence is an add-on solution ready to launch from within your Sage 50 software: no separate installation is required. It's Microsoft Excel-based, so the tools and features may already feel familiar and intuitive. Plus, it includes standard report templates you can use right away. That's what we call fast ROI.

The flexibility of customization—without the frustration

You or your accountant can custom-design almost any report you need, giving you total control over your reporting process. Every customization you make can be saved for future use, sparing you time and effort.

TOP BENEFITS OF SAGE 50 BUSINESS INTELLIGENCE:

- Customizable, dynamic, real-time reports for better visibility into your business
- Ready-to-go within Sage 50; no separate installation required
- Familiar and intuitive Microsoft Excel-based reports
- Customizable report templates included for quick ROI
- Role-based security settings allow you to control user access
- Sophisticated business intelligence created especially for small businesses

The Sage 50 Business Intelligence dashboard provides a real-time overview of your business activities, metrics, and revenues all at a single glance.

Role-based security protects your data

Security controls give you the ability to set access to information based on the user's role, so you can protect the integrity of sensitive or confidential data.

Extraordinary business intelligence at a realistic price

Get the powerful functionality and flexibility of a business intelligence solution designed specifically for small- and mid-sized businesses.

Why Choose Sage 50 Business Intelligence?

Is your manual reporting process tedious and inefficient?

Business Intelligence seamlessly integrates with your Sage 50 software, eliminating the need for redundant data entry. It provides business intelligence in a familiar Microsoft Excel-based interface, using an automated workflow. Automation will not only save your bookkeeping staff valuable hours each month, but it also maintains data integrity and provides accurate and timely information in a meaningful format.

Does the inability to gather and analyze all of your information into one centralized location affect your productivity?

Business Intelligence lets you and your staff access vital information when you need it most. The standard financial, sales, purchasing, and inventory reports included with Business Intelligence help you easily access and interpret business information so you can focus on making better decisions. You have critical information at your fingertips for improved collaboration and productivity.

Does poor insight into business metrics affect your ability to boost profitability?

Go beyond your day-to-day transactions and improve your visibility into your business measurements with Business Intelligence. With real-time access to business information, even across multiple companies and divisions, you can quickly identify and respond to trends helping you make more informed business decisions.
